

## **EXPORTING AMERICAN JOBS**

Think that exporting American jobs is only something impacting manufacturing?  
Think again.

That “sucking sound” you’re hearing is emanating from some of America’s biggest insurance companies.

At the same time these companies are propelling the unemployment rolls in the U.S., they want Americans to buy their insurance policies.

Perhaps the biggest hypocrisy of all comes from an insurance industry shill group ironically called “Americans for Job Security”. If insurers were so interested in “American job security”, why then are they so intent on exporting American jobs?

Here are some insurers who are contributing to the loss of American jobs:

**Aetna**  
**Allstate**  
**Cigna**  
**First American Title Ins.**  
**Guardian Life Insurance**  
**The Hartford Financial Services Group**  
**Kaiser Permanente**  
**MetLife**  
**New York Life Insurance Co.**  
**Prudential Insurance**  
**State Farm Insurance**  
**Washington Mutual**  
**WellChoice**

We urge members to reject these companies and their products and purchase policies from insurers who are not only reputable but also demonstrate their commitment to America by preserving American jobs.
